TECHNICAL SKILLS

Languages

- Python
- HTML, CSS
- JavaScript (Basics)

Frameworks

- Django
- FastAPI
- Bootstrap

Databases

- PostgreSQL
- SQL

Backend & APIs

- REST API development
- Authentication & Authorization
- Django ORM

Language

English : Hindi : Marathi

Education

BSc Information Technology

Cocsit College of Computer Science

Year : 2022-2026

University : Nanded University

Experience

DOM Enterprises (Intern - 2 March - 31 July 2026)

- Worked on IM Tools, an internal e-commerce software platform designed for managing industrial materials and services, primarily used by service and maintenance agencies.
- Provided technical support, Identified and fixed minor UI/UX issues to help ensure smooth day-to-day application usage.

PROJECTS

Blog Application – Django

- Built a full-stack blog application with authentication and role-based access.
- Implemented CRUD operations and relational data models using Django ORM.
- Developed server-rendered UI with Django templates and Bootstrap.
- Applied form validation and basic security practices.

Student–Teacher Management Portal

- Developed a backend-centric system to manage student–teacher relationships with academic year–based mapping.
- Built RESTful APIs using FastAPI and SQLAlchemy with PostgreSQL.
- Implemented secure authentication with password hashing and role-based access.
- Designed year-based teacher allocation logic to automatically assign students.
- Implemented request validation and centralized error handling using Pydantic.

Resume Builder Web Application

- Built a web-based resume builder enabling users to create, edit, preview, and download professional resumes.
- Designed dynamic, section-based form architecture for structured resume data handling and real time resume preview.
- Applied client-side and server-side validation to prevent incomplete or inconsistent data and Integrated PDF export functionality to generate clean, ATS-friendly resumes.
- Optimized resume templates for readability, consistency, and automated screening systems.

GreatKart - E-Commerce Web Application

- Developed a full-stack e-commerce application using Python, Django, HTML, CSS, JavaScript, and SQLite3.
- Implemented user authentication, email verification, role-based authorization, product search/filtering, reviews, and product variants.
- Built a session-based shopping cart with quantity management, tax calculation, and dynamic pricing.
- Developed a user dashboard for order history, profile management, and password management, with automated SMTP emails for account and order notifications.
